TECHNICAL SKILLS

Languages: Python, Java, **TypeScript**, SQL, Bash

Frontend: HTML, CSS, Tailwind, **React.js**, **Next.js**

Backend: Node.js, **FastAPI**, WebSockets, Express.js, tRPC, JWT, OAuth 2.0

Databases & ORMs: MongoDB, **PostgreSQL**, Supabase, Prisma, SQLAlchemy

DevOps & Cloud: **Docker**, Jenkins, **AWS** (EC2, ECR, ECS, S3, Lambda, CloudWatch, CodeCommit), GitHub Actions, Nginx, CI/CD Pipelines, IaC, ELK Stack (Elasticsearch, Logstash, Kibana)

AI/ML Integration: LangChain, LangGraph, OpenAI API, Gemini API, Streamlit, **RAG** (Retrieval Augmented Generation), Vector Databases (PGVector)

Testing: Cypress, Unit Testing, Integration Testing, End-to-End Testing

Developer Tools: Git, GitHub, VS Code, **Claude Code**, Postman, Figma MCP, Linux, Slack, Zoho

EXPERIENCE

KPOINT Technologies Pvt Ltd | *Engineering Intern*

Feb 2025 – Present

- Architected an agentic **RAG** workflow using **LangGraph** state machines for an AI video tutoring assistant with **HITL** `interrupt()/resume` patterns, **PostgreSQL** checkpointing via **AsyncPostgresSaver**, and a hybrid regex + **vector-similarity intent classifier** over a pre-computed embedding corpus to route playback commands without **LLM** inference.
- Engineered a two-stage semantic retrieval pipeline using **Gemini Embeddings** (`gemini-embedding-001`, 1024-dim), **pgvector**, and **IVFFlat** indexing for sub-50ms ANN search, with task-specific embeddings, an in-memory **LRU cache**, **Cohere Rerank v3.5**, and graph-based scope expansion for cross-video context discovery.
- Productionized a real-time multimodal voice AI system on **LiveKit WebRTC**, integrating **Google ADK Gemini Live**, **ElevenLabs**, **Cartesia**, **Sarvam TTS**, and **Silero VAD**; unified streaming inference across **Gemini 2.5 Flash**, **GPT-4o**, **Claude**, and **Sarvam AI** with asymmetric history compression, **PgBouncer** pooling, and **AWS Secrets Manager**.
- Automated application deployments using **Jenkins**, **Docker**, **AWS EC2**, **ECS**, and **ECR** through end-to-end **CI/CD** pipelines, eliminating manual releases and improving deployment reliability.
- Built **ClipKraft** end-to-end—an AI-powered **Python** pipeline that automatically generated short-form video reels from long-form content using **OpenCV** (face detection), **Whisper** (speech-to-text), and **FFmpeg** (highlight extraction), cutting manual video editing effort for content teams.
- Shipped a production-ready embeddable **React** chat SDK with real-time **SSE** streaming, **LiveKit WebRTC** voice integration, and headless **Zustand** state management.

GlobaLeaks Whistleblowing Software | *Open Source Contributor*

Fork

- Implemented **security alert notification workflows** for administrator-triggered account changes including password resets, email changes, account disabling, and account deletion.
- Integrated backend **email templating and notification pipelines** with automated tests to improve auditability and user security in a privacy-focused platform.
- Contributed to project documentation and developer workflows through collaborative open-source pull requests and platform improvements.

PROJECTS

CrowdVibe | *Next.js, TypeScript, tRPC, PostgreSQL, Prisma, Tailwind CSS, SSE*

Live | GitHub

- Built a **real-time music voting platform** where users can join sessions via QR codes and collaboratively control the music queue.
- Implemented **live queue updates and voting** using **Server-Sent Events (SSE)** for seamless real-time interactions.
- Developed a scalable full-stack architecture using **Next.js**, **tRPC**, **Prisma**, and **PostgreSQL**, type-safe APIs.
- Integrated the **YouTube Data API** for song search, queue management, and live music playback.
- Implemented security and fairness features including **rate limiting**, **cooldown systems**, and **guest authentication**.

EDUCATION

All India Shri Shivaji Memorial Institute of Information Technology
Bachelor of Technology in Computer Science

Pune, India
2023 – 2027

ACHIEVEMENTS & STRENGTHS

Secured **95 percentile** in **JEE Mains**; participated in **5+ hackathons**, including a top-15 finish in SIH 2024 Internal Hackathon; pursuing software engineering internship since the **2nd year of college**. Strong communication, leadership, product thinking, user psychology, public speaking, teamwork, adaptability, and self-learning skills.
